

# What do you do when you see a snake?

Here're some tips:

#1

## Do not handle the snake

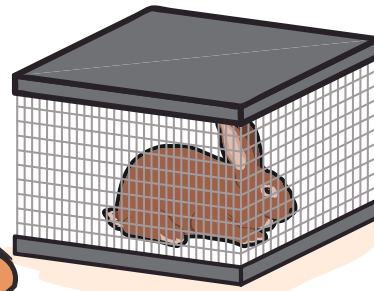

Keep your distance, and keep young children away. Snakes would rather not encounter humans and it is probably as scary for them as it is for you.

#2

## Keep pets out of sight if you spot snakes in your homes

Snakes may prey on pets such as rabbits, white mice, hamsters, cats or amphibians.

#3

## Get professional help

You can call NParks' Animal Response Centre at 1800-476-1600 (24 hours). Observe where the snake is hiding and inform the professionals when they arrive.

#4

## Seek medical attention immediately

in the rare event that you are bitten. Note the snake's appearance as it will assist in the treatment of the wound.
